TOpIC: Security Policy and Procedures

You have been asked to create a security policy for a password management system at Monash University, Caulfield Campus.

INSTRUCTIONS:

1. Create a template (structure) for the security policy 10 marks

2. Using the template create a succinct policy for IT staff and end users regarding management of passwords

   This security policy document should include:

   a. Definition of security 10 marks
   b. Explanation why security is important 10 marks
   c. The scope of this policy 10 marks
   d. Password management techniques
      For IT staff 30 marks
      For employees 30 marks

3. Indicate at the end of your security policy document which references you have used. The list may include those references listed below but are not limited to these.
